| Precautionary statements                                   | -   |

Date of issue/Date of revision

### Section 2. Hazards identification

| Prevention                 | 1 | P280 - Wear eye or face protection.<br>P210 - Keep away from flames and hot surfaces. No smoking.  |
|----------------------------|---|--|
| Response                   | - | P305 + P351 + P338 - IF IN EYES: Rinse cautiously with water for several minutes.<br>Remove contact lenses, if present and easy to do. Continue rinsing.<br>P337 + P313 - If eye irritation persists: Get medical advice or attention. |
| Storage                    | : | P403 + P235 - Store in a well-ventilated place. Keep cool.   |
| Disposal                   | 1 | P501 - Dispose of contents and container in accordance with all local, regional, national and international regulations.   |
| Other hazards which do not | : | None known.  |

result in classification

### Section 3. Composition/information on ingredients

| Substance/mixture                | : Mixture        |
|----------------------------------|------------------|
| Other means of<br>identification | : Not available. |

| Product name        | % (w/w)   | CAS number | Туре       |
|---------------------|-----------|------------|------------|
| ethanol             | ≥25 - ≤50 | 64-17-5    | [1] [2]    |
| tetraethyl silicate | ≥10 - <20 | 78-10-4    | [1]        |
| 产品名称                | % (w/w)   | CAS号码      | 类型         |
| 乙醇                  | ≥25 - ≤50 | 64-17-5    | [1]<br>[2] |
| 四乙氧基硅烷              | ≥10 - <20 | 78-10-4    | [1]        |

There are no additional ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified as hazardous to health or the environment and hence require reporting in this section.

### <u>Type</u>

[1] Substance classified with a health or environmental hazard

[2] Substance with a workplace exposure limit

Occupational exposure limits, if available, are listed in Section 8.

### Section 4. First aid measures

#### Description of necessary first aid measures

| Eye contact  | : Immediately flush eyes with plenty of water, occasionally lifting the upper and lower eyelids. Check for and remove any contact lenses. Continue to rinse for at least 10 minutes. Get medical attention.  |
|--------------|--|
| Inhalation   | : Remove victim to fresh air and keep at rest in a position comfortable for breathing.<br>If not breathing, if breathing is irregular or if respiratory arrest occurs, provide<br>artificial respiration or oxygen by trained personnel. It may be dangerous to the<br>person providing aid to give mouth-to-mouth resuscitation. Get medical attention if<br>adverse health effects persist or are severe. If unconscious, place in recovery<br>position and get medical attention immediately. Maintain an open airway. Loosen<br>tight clothing such as a collar, tie, belt or waistband. |
| Skin contact | <ul> <li>Flush contaminated skin with plenty of water. Remove contaminated clothing and<br/>shoes. Get medical attention if symptoms occur. Wash clothing before reuse.<br/>Clean shoes thoroughly before reuse.</li> </ul>  |

### Section 4. First aid measures

| Ingestion                     | : Wash out mouth with water. Remove dentures if any. If material has been<br>swallowed and the exposed person is conscious, give small quantities of water to<br>drink. Stop if the exposed person feels sick as vomiting may be dangerous. Do not<br>induce vomiting unless directed to do so by medical personnel. If vomiting occurs,<br>the head should be kept low so that vomit does not enter the lungs. Get medical<br>attention if adverse health effects persist or are severe. Never give anything by<br>mouth to an unconscious person. If unconscious, place in recovery position and get<br>medical attention immediately. Maintain an open airway. Loosen tight clothing such<br>as a collar, tie, belt or waistband. |
|-------------------------------|--|
| Most important symptom        | s/effects, acute and delayed   |
| Potential acute health ef     | ifects   |
| Eye contact                   | : Causes serious eye irritation.   |
| Inhalation                    | : No known significant effects or critical hazards.  |
| Skin contact                  | : No known significant effects or critical hazards.  |
| Ingestion                     | : No known significant effects or critical hazards.  |
| <u>Over-exposure signs/sy</u> | <u>mptoms</u>  |
| Eye contact                   | : Adverse symptoms may include the following:<br>pain or irritation<br>watering<br>redness   |
| Inhalation                    | : No specific data.  |
| Skin contact                  | : No specific data.  |
| Ingestion                     | : No specific data.  |
| Indication of immediate n     | nedical attention and special treatment needed, if necessary   |
| Notes to physician            | <ul> <li>Treat symptomatically. Contact poison treatment specialist immediately if large<br/>quantities have been ingested or inhaled.</li> </ul>  |
| Specific treatments           | : No specific treatment.   |

See toxicological information (Section 11)

**Protection of first-aiders** 

### Section 5. Firefighting measures

| Extinguishing media                          |  |
|--|--|
| Suitable extinguishing media                 | : Use dry chemical, CO <sub>2</sub> , water spray (fog) or foam.   |
| Unsuitable extinguishing media               | : Do not use water jet.  |
| Specific hazards arising from the chemical   | : Combustible liquid. Runoff to sewer may create fire or explosion hazard. In a fire or if heated, a pressure increase will occur and the container may burst, with the risk of a subsequent explosion.  |
| Hazardous thermal decomposition products     | : Decomposition products may include the following materials:<br>carbon dioxide<br>carbon monoxide<br>metal oxide/oxides   |
| Special protective actions for fire-fighters | : Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable training. Move containers from fire area if this can be done without risk. Use water spray to keep fire-exposed containers cool. |

: No action shall be taken involving any personal risk or without suitable training. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation.

### Section 5. Firefighting measures

| Special protective<br>equipment for fire-fighters                         | <ul> <li>Fire-fighters should wear appropriate protective equipment and self-contained<br/>breathing apparatus (SCBA) with a full face-piece operated in positive pressure<br/>mode.</li> </ul>  |
|---|--|
| Section 6. Accide   | ntal release measures  |
| Personal precautions,<br>protective equipment and<br>emergency procedures | : No action shall be taken involving any personal risk or without suitable training.<br>Evacuate surrounding areas. Keep unnecessary and unprotected personnel from<br>entering. Do not touch or walk through spilt material. Shut off all ignition sources.<br>No flares, smoking or flames in hazard area. Avoid breathing vapour or mist.<br>Provide adequate ventilation. Wear appropriate respirator when ventilation is<br>inadequate. Put on appropriate personal protective equipment. |
| Environmental precautions   | : Avoid dispersal of spilt material and runoff and contact with soil, waterways, drains and sewers. Inform the relevant authorities if the product has caused environmenta pollution (sewers, waterways, soil or air).   |
| Methods and material for co   | ntainment and cleaning up  |
| Small spill   | : Stop leak if without risk. Move containers from spill area. Use spark-proof tools and explosion-proof equipment. Dilute with water and mop up if water-soluble. Alternatively, or if water-insoluble, absorb with an inert dry material and place in an appropriate waste disposal container. Dispose of via a licensed waste disposal   |

|             | contractor.   |
|-------------|---|
| Large spill | : Stop leak if without risk. Move containers from spill area. Use spark-proof tools and explosion-proof equipment. Approach the release from upwind. Prevent entry into sewers, water courses, basements or confined areas. Wash spillages into an                    |
|             | effluent treatment plant or proceed as follows. Contain and collect spillage with non-<br>combustible, absorbent material e.g. sand, earth, vermiculite or diatomaceous earth<br>and place in container for disposal according to local regulations (see Section 13). |
|             | Dispose of via a licensed waste disposal contractor. Contaminated absorbent   |
|             | material may pose the same hazard as the spilt product. Note: see Section 1 for   |
|             | emergency contact information and Section 13 for waste disposal.  |

## Section 7. Handling and storage

| Precautions for safe handling                                      |   |  |
|--|---|--|
| Protective measures  | : | Put on appropriate personal protective equipment (see Section 8). Do not ingest.<br>Avoid contact with eyes, skin and clothing. Avoid breathing vapour or mist. Use<br>only with adequate ventilation. Wear appropriate respirator when ventilation is<br>inadequate. Do not enter storage areas and confined spaces unless adequately<br>ventilated. Keep in the original container or an approved alternative made from a<br>compatible material, kept tightly closed when not in use. Store and use away from<br>heat, sparks, open flame or any other ignition source. Use explosion-proof electrical<br>(ventilating, lighting and material handling) equipment. Use only non-sparking tools.<br>Empty containers retain product residue and can be hazardous. Do not reuse<br>container. |
| Advice on general occupational hygiene                             | : | Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Workers should wash hands and face before eating, drinking and smoking. Remove contaminated clothing and protective equipment before entering eating areas. See also Section 8 for additional information on hygiene measures.  |
| Conditions for safe storage,<br>including any<br>incompatibilities | : | Store in accordance with local regulations. Store in a segregated and approved area. Store in original container protected from direct sunlight in a dry, cool and well-ventilated area, away from incompatible materials (see Section 10) and food and drink. Eliminate all ignition sources. Separate from oxidising materials. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabelled containers. Use appropriate containment to avoid environmental contamination. See Section 10 for incompatible materials before handling or use.  |

Date of issue/Date of revision

# Section 8. Exposure controls/personal protection

### Control parameters

### **Occupational exposure limits**

| Ingredient name                  | Exposure limits   |
|----------------------------------|---|
| ethanol                          | TW Minstry of Labor, labor permissible<br>workplace exposure standards, allowable<br>concentration (Taiwan, 3/2018).<br>STEL: 1880 mg/m <sup>3</sup> 15 minutes.<br>STEL: 1000 ppm 15 minutes.<br>TWA: 1880 mg/m <sup>3</sup> 8 hours.<br>TWA: 1000 ppm 8 hours.  |
| Biological exposure indice       |   |
| No exposure indices known        |   |
| Appropriate engineering controls | Use only with adequate ventilation. Use process enclosures, local exhaust ventilation or other engineering controls to keep worker exposure to airborne contaminants below any recommended or statutory limits. The engineering control also need to keep gas, vapour or dust concentrations below any lower explosive limits. Use explosion-proof ventilation equipment.   |
| ndividual protection measu       |   |
| Respiratory protection           | Based on the hazard and potential for exposure, select a respirator that meets the appropriate standard or certification. Respirators must be used according to a respiratory protection program to ensure proper fitting, training, and other important aspects of use.  |
| Hand protection                  | There is no one glove material or combination of materials that will give unlimited<br>resistance to any individual or combination of chemicals.<br>The breakthrough time must be greater than the end use time of the product.<br>The instructions and information provided by the glove manufacturer on use,<br>storage, maintenance and replacement must be followed.<br>Gloves should be replaced regularly and if there is any sign of damage to the glove<br>material.<br>Always ensure that gloves are free from defects and that they are stored and used<br>correctly.<br>The performance or effectiveness of the glove may be reduced by physical/chemic<br>damage and poor maintenance.<br>Barrier creams may help to protect the exposed areas of the skin but should not be<br>applied once exposure has occurred. |
|                                  | Wear suitable gloves tested to ISO 374-1:2016.<br>May be used, gloves(breakthrough time) 4 - 8 hours: neoprene (> 0.35 mm), Teflor<br>(> 0.35 mm), nitrile rubber (> 0.4 mm)<br>Not recommended, gloves(breakthrough time) < 1 hour: PVC (> 0.5 mm), polyvinyl<br>alcohol (PVA) (> 0.3 mm)<br>Recommended, gloves(breakthrough time) > 8 hours: 4H/Silver Shield® (> 0.07<br>mm), butyl rubber (> 0.4 mm), Viton® (> 0.7 mm)  |
|                                  | For right choice of glove materials, with focus on chemical resistance and time of penetration, seek advice by the supplier of chemical resistant gloves.   |
|                                  | The user must check that the final choice of type of glove selected for handling this product is the most appropriate and takes into account the particular conditions of use, as included in the user's risk assessment.   |
| Eye protection                   | Safety eyewear complying to ISO 16321-1:2022 should be used when a risk assessment indicates this is necessary to avoid exposure to liquid splashes, mists, gases or dusts. If contact is possible, the following protection should be worn, unless the assessment indicates a higher degree of protection: chemical splash goggles.  |
| Body protection                  | Personal protective equipment for the body should be selected based on the task<br>being performed and the risks involved and should be approved by a specialist<br>before handling this product.   |

### Section 8. Exposure controls/personal protection

| Other skin protection | : Appropriate footwear and any additional skin protection measures should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.   |
|-----------------------|---|
| Hygiene measures      | : Wash hands, forearms and face thoroughly after handling chemical products, before eating, smoking and using the lavatory and at the end of the working period. Appropriate techniques should be used to remove potentially contaminated clothing. Wash contaminated clothing before reusing. Ensure that eyewash stations and safety showers are close to the workstation location. |
|                       |   |

# Section 9. Physical and chemical properties and safety characteristics

The conditions of measurement of all properties are at standard temperature and pressure unless otherwise indicated.

#### **Appearance**

| Physical state  | : Liquid.                    |
|---|------------------------------|
| Colour  | : Clear.                     |
| Odour   | : Characteristic.            |
| Odour threshold   | : Not available.             |
| рН  | Not applicable.              |
| Melting point/freezing point                            | : Not applicable.            |
| Boiling point, initial boiling point, and boiling range | : Not available.             |
| Flash point   | : Closed cup: 62°C (143.6°F) |
| Flammability  | : Not available.             |
| Lower and upper explosion limit/flammability limit      | : 1.3 - 23%                  |

ŝ

#### Vapour pressure

|                        | V         | Vapour Pressure at 20°C |        |       | Vapour pressure at 50°C |        |  |  |

### Section 10. Stability and reactivity

| Chemical stability                 | : The product is stable.  |
|------------------------------------|---|
| Possibility of hazardous reactions | : Under normal conditions of storage and use, hazardous reactions will not occur.   |
| Conditions to avoid                | : Avoid all possible sources of ignition (spark or flame). Do not pressurise, cut, weld, braze, solder, drill, grind or expose containers to heat or sources of ignition. |
| Incompatible materials             | : Reactive or incompatible with the following materials:<br>oxidising materials   |
| Hazardous decomposition products   | : Under normal conditions of storage and use, hazardous decomposition products should not be produced.  |

### Section 11. Toxicological information

### Information on toxicological effects

| Acute toxicity          |                        |         |                          |          |  |  |  |  |

: No known significant effects or critical hazards.

### Section 12. Ecological information

#### **Toxicity**

Not available.

### Persistence and degradability

Not available.

#### **Bioaccumulative potential**

| Product/ingredient name | LogP <sub>ow</sub> | BCF | Potential |
|-------------------------|--------------------|-----|-----------|
| ethanol                 | -0.35              |     | low       |
| tetraethyl silicate     | 3.18               |     | low       |

### **Mobility in soil**

Soil/water partition coefficient (Koc)

: Not available.

**Other adverse effects** : No known significant effects or critical hazards.

### Section 13. Disposal considerations

| Disposal methods | : The generation of waste should be avoided or minimised wherever possible.   |
|------------------|---|
| Disposal methous |   |
|                  | Disposal of this product, solutions and any by-products should at all times comply  |
|                  | with the requirements of environmental protection and waste disposal legislation and  |
|                  | any regional local authority requirements. Dispose of surplus and non-recyclable  |
|                  | products via a licensed waste disposal contractor. Waste should not be disposed of untreated to the sewer unless fully compliant with the requirements of all authorities |
|                  | with jurisdiction. Waste packaging should be recycled. Incineration or landfill   |
|                  | should only be considered when recycling is not feasible. This material and its   |
|                  | container must be disposed of in a safe way. Care should be taken when handling   |
|                  | emptied containers that have not been cleaned or rinsed out. Empty containers or  |
|                  | liners may retain some product residues. Vapour from product residues may create  |
|                  | a highly flammable or explosive atmosphere inside the container. Do not cut, weld   |
|                  | or grind used containers unless they have been cleaned thoroughly internally. Avoid   |
|                  |   |
|                  | dispersal of spilt material and runoff and contact with soil, waterways, drains and   |
|                  | sewers.   |
