# SAFETY DATA SHEET

### Jota Armour Comp C

### Section 1. Chemical product and company identification

| GHS product identifier           | : Jota Armour Comp C |
|----------------------------------|----------------------|
| Product code                     | : 464                |
| Chemical name                    | : aluminium oxide    |
| Other means of<br>identification | : Not available.     |
| Product type                     | : Solid.             |
| Product description              | : Inert material.    |
|                                  |                      |

#### Relevant identified uses of the substance or mixture and uses advised against

Use in coatings - Industrial use Use in coatings - Professional use

| Supplier's details   | : Jotun Kazakhstan LLP<br>Al-Farabi Ave., 15, Nurly-Tau business center, building 4V, 9th floor,<br>premise No. 18-4V-9NP, Almaty,<br>Republic of Kazakhstan |
|--|--|
|  | Tel: +7 (727) 311 56 37 / +7 (727) 311 56 85   |
|  | infokz@jotun.com<br>SDSJotun@jotun.com   |
| Emergency telephone<br>number (with hours of<br>operation) | : 112 – Department for emergency situations<br>101 – Fire department; 103 – Ambulance  |

### Section 2. Hazards identification

Classification of the substance or mixture according to GOST 32419-2013 and GOST 32423/24/25-2013

Classification of the substance or mixture

: Not classified.

| GHS label elements       |   |
|--------------------------|---|
| Signal word              | : No signal word.                                   |
| Hazard statements        | : No known significant effects or critical hazards. |
| Precautionary statements |   |
| General                  | : Not applicable.                                   |
| Prevention               | : P261 - Avoid breathing dust.                      |
| Response                 | : Not applicable.                                   |
| Storage                  | : Not applicable.                                   |
| Disposal                 | : Not applicable.                                   |
|                          |   |

# Section 2. Hazards identification

Other hazards which do not : None known. result in classification

# Section 3. Composition/information on ingredients

| Substance/mixture | : Substance       |
|-------------------|-------------------|
| Chemical name     | : aluminium oxide |
| Other means of    | : Not available.  |
| identification    |                   |

### **CAS number/other identifiers**

| EC number  | : | Not availa | ble. |
|------------|---|------------|------|
| CAS number | : | 1344-28-1  |      |

| Ingredient name | %   | Identifiers    | Classification  | Туре |
|-----------------|-----|----------------|-----------------|------|
| alumina         | 100 | CAS: 1344-28-1 | Not classified. | [1]  |

There are no additional ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified as hazardous to health or the environment and hence require reporting in this section.

### **Type**

[1] Constituent

Occupational exposure limits, if available, are listed in Section 8.

### Section 4. First aid measures

### Description of necessary first aid measures

| Description of necess | ary mist and measures   |
|-----------------------|---|
| Eye contact           | <ul> <li>Immediately flush eyes with plenty of water, occasionally lifting the upper and lower<br/>eyelids. Check for and remove any contact lenses. Get medical attention if irritation<br/>occurs.</li> </ul>   |
| Inhalation            | <ul> <li>Remove victim to fresh air and keep at rest in a position comfortable for breathing.<br/>Get medical attention if symptoms occur.</li> </ul>   |
| Skin contact          | <ul> <li>Flush contaminated skin with plenty of water. Remove contaminated clothing and<br/>shoes. Get medical attention if symptoms occur.</li> </ul>  |
| Ingestion             | Wash out mouth with water. If material has been swallowed and the exposed<br>person is conscious, give small quantities of water to drink. Do not induce vomiting<br>unless directed to do so by medical personnel. Get medical attention if symptoms<br>occur. |

### Most important symptoms/effects, acute and delayed

| Potential acute healt  | <u>n effects</u>  |
|------------------------|---|
| Eye contact            | : No known significant effects or critical hazards.   |
| Inhalation             | : No known significant effects or critical hazards.   |
| Skin contact           | : No known significant effects or critical hazards.   |
| Ingestion              | : No known significant effects or critical hazards.   |
| Over-exposure signs    | /symptoms   |
| Eye contact            | : No specific data.   |
| Inhalation             | : No specific data.   |
| Skin contact           | : No specific data.   |
| Ingestion              | : No specific data.   |
|                        |   |
| Indication of immediat | e medical attention and special treatment needed, if necessary  |
| Notes to physician     | <ul> <li>Treat symptomatically. Contact poison treatment specialist immediately if large<br/>quantities have been ingested or inhaled.</li> </ul> |
| Specific treatments    | : No specific treatment.  |

### Section 4. First aid measures

Protection of first-aiders

: No action shall be taken involving any personal risk or without suitable training.

### See toxicological information (Section 11)

| Section 5. Firefighting measures               |   |  |
|--|---|--|
| Extinguishing media                            |   |  |
| Suitable extinguishing media                   | : Use an extinguishing agent suitable for the surrounding fire.   |  |
| Unsuitable extinguishing media                 | : None known.   |  |
| Specific hazards arising from the chemical     | : No specific fire or explosion hazard.   |  |
| Hazardous thermal decomposition products       | : Decomposition products may include the following materials:<br>metal oxide/oxides   |  |
| Special protective actions for fire-fighters   | : Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable training.   |  |
| Special protective equipment for fire-fighters | <ul> <li>Fire-fighters should wear appropriate protective equipment and self-contained<br/>breathing apparatus (SCBA) with a full face-piece operated in positive pressure<br/>mode.</li> </ul> |  |

# Section 6. Accidental release measures

### Personal precautions, protective equipment and emergency procedures

| · · · · · · · · · · · · · · · · · · · |     |  |
|---------------------------------------|-----|--|
| For non-emergency<br>personnel        | :   | No action shall be taken involving any personal risk or without suitable training.<br>Evacuate surrounding areas. Keep unnecessary and unprotected personnel from<br>entering. Do not touch or walk through spilt material. Put on appropriate personal<br>protective equipment.   |
| For emergency responders              | :   | If specialised clothing is required to deal with the spillage, take note of any information in Section 8 on suitable and unsuitable materials. See also the information in "For non-emergency personnel".  |
| Environmental precautions             | :   | Avoid dispersal of spilt material and runoff and contact with soil, waterways, drains<br>and sewers. Inform the relevant authorities if the product has caused environmental<br>pollution (sewers, waterways, soil or air).  |
| Methods and material for con          | tai | nment and cleaning up  |
| Small spill                           | :   | Move containers from spill area. Vacuum or sweep up material and place in a designated, labelled waste container. Dispose of via a licensed waste disposal contractor.   |
| Large spill                           | :   | Move containers from spill area. Prevent entry into sewers, water courses, basements or confined areas. Vacuum or sweep up material and place in a designated, labelled waste container. Dispose of via a licensed waste disposal contractor. Note: see Section 1 for emergency contact information and Section 13 for waste disposal. |

### Section 7. Handling and storage

#### Precautions for safe handling

| Protective measures                    | : Put on appropriate personal protective equipment (see Section 8).   |
|--|---|
| Advice on general occupational hygiene | : Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Workers should wash hands and face before eating, drinking and smoking. Remove contaminated clothing and protective equipment before entering eating areas. See also Section 8 for additional information on hygiene measures. |

# Section 7. Handling and storage

| Conditions for safe storage,<br>including any<br>incompatibilities | : Store in accordance with local regulations. Store in original container protected<br>from direct sunlight in a dry, cool and well-ventilated area, away from incompatible<br>materials (see Section 10) and food and drink. Keep container tightly closed and<br>sealed until ready for use. Containers that have been opened must be carefully<br>resealed and kept upright to prevent leakage. Do not store in unlabelled containers.<br>Use appropriate containment to avoid environmental contamination. See Section 10<br>for incompatible materials before handling or use |
|--|--|
|  | for incompatible materials before handling or use.   |

See Technical Data Sheet / packaging for further information.

### Section 8. Exposure controls/personal protection

#### **Control parameters**

#### **Occupational exposure limits**

| Ingredient name | Exposure limits   |
|-----------------|---|
| alumina         | Order of the Minister of Health of the<br>Republic of Kazakhstan on approval of<br>hygienic standards for atmospheric air in<br>urban and rural settlements, on the<br>territories of industrial organizations<br>dated August 2, 2022 No.DSM -70 (KZ,<br>8/2022).<br>TWA: 6 mg/m <sup>3</sup> 8 hours. Form: aerosol<br>disintegration |

### **Biological exposure indices**

No exposure indices known.

| Appropriate engineering controls | - 1  | Good general ventilation should be sufficient to control worker exposure to airborne contaminants.   |  |  |
|----------------------------------|------|--|--|--|
| Environmental exposure controls  | :    | Emissions from ventilation or work process equipment should be checked to ensur<br>they comply with the requirements of environmental protection legislation. In some<br>cases, fume scrubbers, filters or engineering modifications to the process<br>equipment will be necessary to reduce emissions to acceptable levels.   |  |  |
| Individual protection meas       | ures |  |  |  |
| Hygiene measures                 | :    | Wash hands, forearms and face thoroughly after handling chemical products, before<br>eating, smoking and using the lavatory and at the end of the working period.<br>Appropriate techniques should be used to remove potentially contaminated clothing.<br>Wash contaminated clothing before reusing. Ensure that eyewash stations and<br>safety showers are close to the workstation location.  |  |  |
| Eye/face protection              | :    | Safety eyewear complying to ISO 16321-1:2022 should be used when a risk assessment indicates this is necessary to avoid exposure to liquid splashes, mists, gases or dusts. If contact is possible, the following protection should be worn, unless the assessment indicates a higher degree of protection: safety glasses with side-shields.  |  |  |
| Skin protection                  |      |  |  |  |
| Hand protection                  | :    | There is no one glove material or combination of materials that will give unlimited<br>resistance to any individual or combination of chemicals.<br>The breakthrough time must be greater than the end use time of the product.<br>The instructions and information provided by the glove manufacturer on use,<br>storage, maintenance and replacement must be followed.<br>Gloves should be replaced regularly and if there is any sign of damage to the glove<br>material.<br>Always ensure that gloves are free from defects and that they are stored and used<br>correctly.<br>The performance or effectiveness of the glove may be reduced by physical/chemical<br>damage and poor maintenance. |  |  |
| Date of issue/Date of revision   |      | : 30.10.2024 Date of previous issue : No previous validation Version : 1 4/9   |  |  |

# Section 8. Exposure controls/personal protection

|                        | Barrier creams may help to protect the exposed areas of the skin but should not be applied once exposure has occurred.   |
|------------------------|--|
|                        | For right choice of glove materials, with focus on chemical resistance and time of penetration, seek advice by the supplier of chemical resistant gloves.  |
|                        | The user must check that the final choice of type of glove selected for handling this product is the most appropriate and takes into account the particular conditions of use, as included in the user's risk assessment.                      |
| Body protection        | <ul> <li>Personal protective equipment for the body should be selected based on the task<br/>being performed and the risks involved and should be approved by a specialist<br/>before handling this product.</li> </ul>                        |
| Other skin protection  | <ul> <li>Appropriate footwear and any additional skin protection measures should be<br/>selected based on the task being performed and the risks involved and should be<br/>approved by a specialist before handling this product.</li> </ul>  |
| Respiratory protection | : If workers are exposed to concentrations above the exposure limit, they must use a respirator according to EN 140. By spraying : particulate filter (FFP2 / N95). In confined spaces, use compressed-air or fresh-air respiratory equipment. |

# Section 9. Physical and chemical properties and safety characteristics

The conditions of measurement of all properties are at standard temperature and pressure unless otherwise indicated.

| <u>Appearance</u>                                       |       |   |  |  |
|---|-------|---|--|--|
| Physical state  | : So  | lid. [Powder.]                                      |  |  |
| Colour  | : Co  | Colourless.   |  |  |
| Odour   | : Ch  | naracteristic.                                      |  |  |
| Odour threshold   | : No  | ot applicable.                                      |  |  |
| рН  | : No  | ot applicable.                                      |  |  |
| Melting point/freezing point                            | : No  | ot applicable.                                      |  |  |
| Boiling point, initial boiling point, and boiling range | : No  | ot available.                                       |  |  |
| Flash point   | : No  | ot applicable.                                      |  |  |
| Evaporation rate  | : No  | ot available.                                       |  |  |
| Flammability  | : No  | ot applicable.                                      |  |  |
| Lower and upper explosion limit/flammability limit      | : No  | : Not applicable.                                   |  |  |
| Vapour pressure   | : No  | : Not available.                                    |  |  |
| Relative vapour density                                 | : No  | : Not available.                                    |  |  |

| Partition coefficient: n-<br>octanol/water              | : No  | ot available.                                       |  |  |
| Auto-ignition temperature                               | : No  | : Not applicable.                                   |  |  |
| Decomposition temperature                               | : No  | : Not available.                                    |  |  |
| Viscosity   | : Ki  | : Kinematic (40°C (104°F)): >20.5 mm²/s (>20.5 cSt) |  |  |
| Particle characteristics                                |       |   |  |  |
| Median particle size                                    | : No  | ot available.                                       |  |  |

### Section 10. Stability and reactivity

| Reactivity                         | : No specific test data related to reactivity available for this product or its ingredients.           |
|------------------------------------|--|
| Chemical stability                 | : The product is stable.   |
| Possibility of hazardous reactions | : Under normal conditions of storage and use, hazardous reactions will not occur.                      |
| Conditions to avoid                | : No specific data.  |
| Incompatible materials             | : No specific data.  |
| Hazardous decomposition products   | : Under normal conditions of storage and use, hazardous decomposition products should not be produced. |

# Section 11. Toxicological information

### Information on toxicological effects

Acute toxicity

Not available.

### Irritation/Corrosion

Not available.

### **Sensitisation**

Not available.

#### **Mutagenicity**

Not available.

### **Carcinogenicity**

Not available.

### **Reproductive toxicity**

Not available.

### **Teratogenicity**

Not available.

### Specific target organ toxicity (single exposure)

Not available.

### Specific target organ toxicity (repeated exposure)

Not available.

### **Aspiration hazard**

Not available.

### Information on likely routes : Not available.

of exposure

### Potential acute health effects

| Eye contact  | : No known significant effects or critical hazards. |
|--------------|---|
| Inhalation   | : No known significant effects or critical hazards. |
| Skin contact | : No known significant effects or critical hazards. |
| Ingestion    | : No known significant effects or critical hazards. |

| Symptoms related to | the physical, chemical and toxicological characteristics |
|---------------------|--|
| Eye contact         | : No specific data.                                      |
| Inhalation          | : No specific data.                                      |
| Skin contact        | : No specific data.                                      |
| Ingestion           | : No specific data.                                      |

# Section 11. Toxicological information

### Delayed and immediate effects as well as chronic effects from short and long-term exposure

| <u>Short term exposure</u>    |   |
|-------------------------------|---|
| Potential immediate effects   | : Not available.                                    |
| Potential delayed effects     | : Not available.                                    |
| <u>Long term exposure</u>     |   |
| Potential immediate effects   | : Not available.                                    |
| Potential delayed effects     | : Not available.                                    |
| Potential chronic health effe | <u>ects</u>   |
| Not available.                |   |
| General                       | : No known significant effects or critical hazards. |
| Carcinogenicity               | : No known significant effects or critical hazards. |
| Mutagenicity                  | : No known significant effects or critical hazards. |
| Reproductive toxicity         | : No known significant effects or critical hazards. |

#### Numerical measures of toxicity

### Acute toxicity estimates N/A

# Section 12. Ecological information

#### **Toxicity**

Not available.

### Persistence and degradability

Not available.

### **Bioaccumulative potential**

Not available.

### **Mobility in soil**

Soil/water partition : Not available. coefficient (Koc)

#### Other adverse effects : No known significant effects or critical hazards.

### Section 13. Disposal considerations

| Disposal methods               | : The generation of waste should be avoided or minimised wherever possible.<br>Disposal of this product, solutions and any by-products should at all times comply<br>with the requirements of environmental protection and waste disposal legislation and<br>any regional local authority requirements. Dispose of surplus and non-recyclable<br>products via a licensed waste disposal contractor. Waste should not be disposed of<br>untreated to the sewer unless fully compliant with the requirements of all authorities<br>with jurisdiction. Waste packaging should be recycled. Incineration or landfill<br>should only be considered when recycling is not feasible. This material and its<br>container must be disposed of in a safe way. Empty containers or liners may retain<br>some product residues. Avoid dispersal of spilt material and runoff and contact with<br>soil, waterways, drains and sewers. |
