

Durathane Clear

Product description

Type

This product is a two pack topcoat based on polyurethane resin.

Features and benefits

Provides durable high gloss finish.

Recommended use

Ideal as a clear topcoat over Epoxy or Polyurethane systems, in interiors.

Substrate

Cement plaster, Concrete, Steel.

Product data

Packaging size	4.5L and 18L
Solids by volume	38 ± 2 volume% Theoretical
Specific gravity	0.95
VOC	541 g/l ISO 11890 EU
VOC comments	This is the theoretical value. Tested value will vary depending on test methodology, accuracy of equipment used for testing and test conditions.

Application data

Remarks

Handle with care. Stir well before use.

The product can be applied by

Spray : Use airless spray or conventional spray.

Roller : May be used. However when using roller application care must be taken to apply sufficient material in order to achieve the specified dry film thickness.

Brush : Recommended for stripe coating and small areas, care must be taken to achieve the specified dry film thickness.

Film thickness per coat

Typical recommended range

Dry film thickness 15 - 50 µm

Wet film thickness 40 - 130 µm

Film thickness will vary and is calculated as average.

Theoretical spreading rate 25.3 - 7.6 m²/l

Spreading rate depends on film thickness applied, type of texture, surface porosity, imperfections, temperature, wastage during painting etc. Maximum spread rate per coat is obtained at minimum dry film thickness and vice versa.

Product mixing ratio (by volume)

Durathane Clear Comp A	9	part(s)
Durathane Comp B	1	part(s)

Thinner

Jotun Thinner No. 10

Dilution

Maximum 10 %

Conditions during application

The temperature of the substrate should be minimum 10 °C and at least 3 °C above the dew point of the air, measured in the vicinity of the substrate. Good ventilation is usually required in confined areas to ensure proper drying. The moisture content in the substrate should not exceed 4 % (by weight). The coating should not be exposed to oil, chemicals or mechanical stress until fully cured.

Drying times

Drying times are generally related to air circulation, temperature, film thickness and number of coats, and will be affected correspondingly. The figures given in the table are typical with:

1. Recommended data given is, for recoating with the same generic type of paint.
2. In case of multi-coat application, drying times will be influenced by the number and sequence and by the total thickness of previous coats applied.
3. The surface should be dry and free from any contamination prior to application of the subsequent coat.

The drying time is measured by stated values:

Relative Humidity (RH) 50 %

Substrate temperature	0 °C	5 °C	10 °C	23 °C	40 °C
Surface (touch) dry	4 h	2 h	1 h	0.5 h	0.5 h
Hard dry	20 h	10 h	6 h	3 h	1.5 h
Dry to over coat, minimum	12 h	10 h	6 h	3 h	1.5 h
Cured	20 d	15 d	10 d	5 d	2 d

Directions for use

Surface preparation

The substrate must be sound, clean, dry and free from dust, oil, grease, laitance etc. All traces of form release agents/curing agents must be removed. A light sanding with suitable abrasive material is recommended before application. Any resulting dust/loose particles must be removed.

Recommended paint system

Topcoat

Durathane Clear : 2 Coats

Other paint systems

Penguard Clear Sealer or Penguard HB : 1 Coats

Durathane Clear : 2 Coats

Remarks

Other systems may be specified, depending on area of use.

Contents of packaging with different batch numbers must be mixed together before use.

Please refer to the Decorative Sales Department for technical advice.

This product is available in: : United Arab Emirates, Bahrain, Kuwait, Qatar, Saudi and Oman

Storage

The product must be stored in accordance with national regulations. Keep the containers in a dry, cool, well ventilated space and away from sources of heat and ignition. Containers must be kept tightly closed. Handle with care.

Shelf life at 23 °C

Durathane Clear Comp A 24 month(s)

Durathane Comp B 24 month(s)

In some markets commercial shelf life can be dictated shorter by local legislation. The above is minimum shelf life, thereafter the paint quality is subject to re-inspection.

Health and safety

Please observe the environmental and precautionary notices displayed on the container.

A Material Safety Data Sheet for the product has been issued.

Detailed information regarding health and safety risks and precautions for the use of this product is specified in the product's Safety Data Sheet.

First-aid measures, refer to section 4.

Handling and storage, refer to section 7.

Transport information, refer to section 14.

Regulatory information, refer to section 15.
