

Oxipro Imprimación

Product description

Type

Based on alkyd resin.

Features and benefits

Contains Zinc phosphate as active corrosion preventing pigments. Resistant against dry heat up to 120°C. Extreme rust protection. Ideal as a primer on most substrates.

Recommended use

Ideal as primer for steel and aluminium structures where a fast-drying primer is required.

Substrate

Steel and other metals properly primed.

Product data

Packaging size 0.375 L, 0.75 L and 4 L

Colours White

Solids by volume 47 ± 2 volume%

VOC for Ready-for-Use Mixture EU limit value for the product (cat. A/i): 500 g/l. The product contains max 500 g/l VOC.

Application data

The product can be applied by

Brush : Recommended.

Roller : Recommended.

Spray : Use airless spray or conventional spray.

Guiding data for airless spray

Nozzle tip 0.021–0.027"

Spray angle degrees 65–80°

Pressure at nozzle 140 - 190 kg/cm² (2100 psi)

Cleaning of painting tools

Jotun Thinner No. 2

Film thickness per coat

Typical recommended range

Dry film thickness 30 - 40 µm
Wet film thickness 65 - 85 µm
Film thickness will vary and are calculated as an average.

Theoretical spreading rate 15.7 - 11.8 m²/l

Spreading rate depends on film thickness applied, type of texture, surface porosity, imperfections, temperature, wastage during painting etc.

Thinner

Jotun Thinner No. 2

Conditions during application

The temperature of the substrate should be minimum 10 °C and at least 3 °C above the dew point of the air, measured in the vicinity of the substrate. Good ventilation is usually required in confined areas to ensure proper drying. The moisture content in the substrate should not exceed 4 % (by weight). The coating should not be exposed to oil, chemicals or mechanical stress until fully cured.

Drying times

Drying times are generally related to air circulation, temperature, film thickness and number of coats, and will be affected correspondingly.

1. Recommended data given is, for recoating with the same generic type of paint.
2. In case of multi-coat application, drying times will be influenced by the number and sequence and by the total thickness of previous coats applied.
3. The surface should be dry and free from any contamination prior to application of the subsequent coat.

The drying time is measured by stated values:

Relative Humidity (RH) 50 %

Substrate temperature 23 °C

Surface (touch) dry	1.5 h
Hard dry	8 h
Dry to over coat, minimum	5 h

Directions for use

Surface preparation

The substrate must be sound, clean, dry and free from dust, oil, grease, laitance etc. All traces of form release agents/curing agents must be removed. A light sanding with suitable abrasive material is recommended before application. Any resulting dust/loose particles must be removed.

Recommended paint system

Primer

Oxipro Imprimación : 1 Coat

Topcoat

Oxipro Brillante or Oxipro Satinado : 2 Coats

Remarks

Other systems may be specified, depending on area of use.

Contents of packaging with different batch numbers must be mixed together before use.

Please refer to the Decorative Sales Department for technical advice.

Storage

The product must be stored in accordance with national regulations. Keep the containers in a dry, cool, well ventilated space and away from sources of heat and ignition. Containers must be kept tightly closed. Handle with care.

Health and safety

Please observe the environmental and precautionary notices displayed on the container.

A Material Safety Data Sheet for the product has been issued.

Detailed information regarding health and safety risks and precautions for the use of this product is specified in the product's Safety Data Sheet.

First-aid measures, refer to section 4.

Handling and storage, refer to section 7.

Transport information, refer to section 14.

Regulatory information, refer to section 15.
