Technical Data Sheet

Pilot WF SM

Product description

This is a one component waterborne acrylic emulsion coating. It is a versatile, fast drying product for interior use. It has a semi-gloss finish with good colour and gloss retention. Dries down to 50 °F (10 °C). Ideal for new construction or maintenance where fast dry to handle and over coating times are required. To be used as topcoat in atmospheric environments. It is part of a complete waterborne system with a recommended Jotun waterborne primer and SteelMaster WF products.

Typical use

Protective:

Developed mainly for use on intumescent products (SteelMaster). Should be applied on-site and is best suited for indoor environment.

Colors

This product is tintable in a wide range of colors in Jotun's Multicolor Decorative (MCD) system.

Product data

Property	Test/Standard	De	scription
Solids by volume			45±2%
Gloss level (GU 60 °)	ISO 2813	35 +/- 5 GU	
Flash point	ISO 3679 Method 1	214 °F (101 °C)	
Density	calculated	1.3 kg/l	
Region	Regulation	Test Standard	VOC Value
US	CARB(SCM)2020 / SCAQMD rule 1113	Calculated	1.36 lbs/gal

The provided data is typical for factory produced products, subject to slight variation depending on color. Gloss description: According to Jotun Performance Coatings' definition.

Date of issue: 28 February 2025

This technical data sheet supersedes those previously issued.

The Technical Data Sheet (TDS) is recommended to be read in conjunction with the Safety Data Sheet (SDS) and the Application Guide (AG) for this product. For your nearest local Jotun office, please visit our website at www.jotun.com

Film thickness per coat

Typical recommended specification range

Dry film thickness	1.6 mils (40 µm)	3 mils (80 µm)
Wet film thickness	4 mils (89 µm)	7 mils (178 µm)
Theoretical spreading rate	460 ft²/gal (11.3 m²/l)	230 ft²/gal (5.6 m²/l)

This product can be applied up to 50 % higher than maximum specified film thickness without loss of technical properties. Application at substrate temperatures above 40°C and in direct sunlight may cause surface defects.

Surface preparation

Surface preparation summary table

	Surface preparation		
Substrate	Minimum	Recommended	
Coated surfaces	Clean, dry and undamaged compatible coating	Clean, dry and undamaged compatible coating	

Application

Application methods

The product can be applied by

Spray:	Use airless spray.
Brush:	Recommended for stripe coating and small areas, care must be taken to achieve the specified dry film thickness.
Roller:	Use a suitable roller. However when using roller application care must be taken to apply sufficient material in order to achieve the specified dry film thickness.

Product mixing

Single pack

Date of issue: 28 February 2025

This technical data sheet supersedes those previously issued.

The Technical Data Sheet (TDS) is recommended to be read in conjunction with the Safety Data Sheet (SDS) and the Application Guide (AG) for this product. For your nearest local Jotun office, please visit our website at www.jotun.com

Thinner/Cleaning solvent

The product MUST NOT be thinned. Cleaning solvent: Water

Guiding data for airless spray

Nozzle tip (inch/1000):13-19Pressure at nozzle (minimum):150 bar/ 2100 psi

Drying and Curing time

Substrate temperature	50 °F	73 °F	104 °F
Surface (touch) dry Dried to over coat, minimum		20 min 1.5 h	

For maximum overcoating intervals, refer to the Application Guide (AG) for this product.

Drying and curing times are determined under controlled temperatures and relative humidity below 75 %, and at average of the DFT range for the product.

The recommended Relative Humidity range is 30-75 %.

Surface (touch) dry: The state of drying when slight pressure with a finger does not leave an imprint or reveal tackiness.

Dry to over coat, minimum: The recommended shortest time before the next coat can be applied.

Heat resistance

	Temperature		
	Continuous	Peak	
Dry, atmospheric	70 °C	80 °C	

The dry coating film will be gradually softer as temperature increases. Correct procedures for handling and stacking must be established, depending on environmental conditions. Protective properties will not be influenced.

Peak temperature duration max. 1 hour.

The temperatures listed relate to retention of protective properties. Aesthetic properties may suffer at these temperatures.

Date of issue: 28 February 2025

This technical data sheet supersedes those previously issued.

Product compatibility

Depending on the actual exposure of the coating system, various primers and topcoats can be used in combination with this product. Some examples are shown below. Contact Jotun for specific system recommendation.

Previous coat: acrylic, epoxy

Additional information

Procedure for preparation and cleaning of application equipment

To avoid solvent contamination of the waterborne paint the spraying equipment has to be conditioned before use. All equipment containing solvents in the pump, hoses and gun have to be thoroughly cleaned according to the following instructions. If the application equipment is made in stainless steel, designed for and only used for application of waterborne coatings this preparation and cleaning procedure is not needed.

Before spraying:

Circulate Jotun Thinner No. 17 through the equipment and hoses. Then Jotun Thinner No. 4 before fresh clean water.

After spraying:

Clean the equipment and hoses with water and alkaline detergent, then circulate Jotun Thinner No. 4 and finally Jotun Thinner No. 17.

Packaging (typical)

	Volume	Size of containers	
	(liters)	(liters)	
Pilot WF SM	4.5/18	5 / 20	

The volume stated is for factory made colors. Note that local variants in pack size and filled volumes can vary due to local regulations.

Storage

The product must be stored in accordance with national regulations. Keep the containers in a dry, shaded, cool, well-ventilated space and away from sources of heat and ignition. Containers must be kept tightly closed. Handle with care.

Shelf life at 73°F (23 °C)

Pilot WF SM

12 month(s)

In some markets commercial shelf life can be dictated shorter by local legislation. The above is minimum shelf life, thereafter the paint quality is subject to re-inspection.

Environmental Documentation

Date of issue: 28 February 2025

This technical data sheet supersedes those previously issued.

The Technical Data Sheet (TDS) is recommended to be read in conjunction with the Safety Data Sheet (SDS) and the Application Guide (AG) for this product. For your nearest local Jotun office, please visit our website at www.jotun.com

This product can contribute to Green Building Standard credits. Please refer to Jotun.com for more information or contact your local Jotun representative.

Environmental Product Declaration (EPD) is available at www.epd-norge.no

Note

This product is for professional use only. The applicators and operators shall be trained, experienced and have the capability and equipment to mix/stir and apply the coatings correctly and according to Jotun's technical documentation. Applicators and operators shall use appropriate personal protection equipment when using this product. This guideline is given based on the current knowledge of the product. Any suggested deviation to suit the site conditions shall be forwarded to the responsible Jotun representative for approval before commencing the work.

Health and safety

Please observe the precautionary notices displayed on the container. Use under well ventilated conditions. Do not inhale spray mist. Avoid skin contact. Spillage on the skin should immediately be removed with suitable cleanser, soap and water. Eyes should be well flushed with water and medical attention sought immediately.

Color variation

When applicable, products primarily meant for use as primers or antifoulings may have slight color variations from batch to batch. Such products and epoxy based products used as a finish coat may chalk when exposed to sunlight and weathering.

Color and gloss retention on topcoats/finish coats may vary depending on type of color, exposure environment such as temperature, UV intensity etc., application quality and generic type of paint. Contact your local Jotun office for further information.
