

Jotun Siloxane Acrylic Primer

Product description

Type

This product is a clear coat based on a silane siloxane and an acrylic resin.

Features and benefits

Penetrates and impregnates the host substrate to form a hydrophobic barrier which cures with the influence of atmospheric humidity and condenses to a tack free film. Act repulsive to water.

Recommended use

Ideal for protecting concrete surfaces.

Product data

Packaging size	18L Turkey : 2.5L and 15 L
Colours	Clear
Solids by volume	11 ± 2 volume%
VOC	739 g/l ISO 11890 EU
VOC	739 g/l EU VOC Directive 2004/42/CE (theoretical)
VOC	739 g/l IED (2010/75/EU) (theoretical) g/l
VOC	739 g/l US EPA method 24 (theoretical) (CARB(SCM)2007, SCAQMD rule 1113, Hong Kong)
VOC	739 g/l US EPA method 24
VOC comments	This is the theoretical value. Tested value will vary depending on test methodology, accuracy of equipment used for testing and test conditions.

Application data

Remarks

Handle with care. Stir well before use.

The product can be applied by

Roller : Recommended.

Brush : Recommended to paint corners and edges.

Spray : Conventional air-atomised, airless spray or air-assisted airless.

Guiding data for airless spray

Nozzle tip	0.33-0.46 mm (0.013-0.018")
Spray angle degrees	40° - 80°
Pressure at nozzle	15 MPa (150 kp/cm ² , 2100 psi)

Cleaning of painting tools

Jotun Thinner No. 2

Film thickness per coat

Typical recommended range

Film thickness will vary and is calculated as average.

Theoretical spreading rate 10 - 8 m²/l

Spreading rate depends on film thickness applied, type of texture, surface porosity, imperfections, temperature, wastage during painting etc.

Thinner

Jotun Thinner No. 2

Dilution

Maximum 10 %

Conditions during application

The temperature of the substrate should be minimum 10 °C and at least 3 °C above the dew point of the air, measured in the vicinity of the substrate. Good ventilation is usually required in confined areas to ensure proper drying. The moisture content in the substrate should not exceed 4 % (by weight). The coating should not be exposed to oil, chemicals or mechanical stress until fully cured.

Drying times

Drying times are generally related to air circulation, temperature, film thickness and number of coats, and will be affected correspondingly. The figures given in the table are typical with:

1. Recommended data given is, for recoating with the same generic type of paint.
2. In case of multi-coat application, drying times will be influenced by the number and sequence and by the total thickness of previous coats applied.
3. The surface should be dry and free from any contamination prior to application of the subsequent coat.

The drying time is measured by stated values:

Relative Humidity (RH) 50 %

Substrate temperature	10 °C	23 °C	40 °C
Surface (touch) dry	5 h	3 h	1 h
Hard dry	10 h	6 h	2 h
Dry to over coat, minimum	10 h	6 h	2 h

Directions for use

Surface preparation

The substrate must be sound, clean, dry and free from dust, oil, grease, laitance etc. All traces of form release agents/curing agents must be removed. A light sanding with suitable abrasive material is recommended before application. Any resulting dust/loose particles must be removed.

Recommended paint system

Primer

Jotun Siloxane Acrylic Primer : 1 or 2 Coats

Topcoat

Recommended paint system

Remarks

Other systems may be specified, depending on area of use.

Contents of packaging with different batch numbers must be mixed together before use.

Please refer to the Decorative Sales Department for technical advice.

Storage

The product must be stored in accordance with national regulations. Keep the containers in a dry, cool, well ventilated space and away from sources of heat and ignition. Containers must be kept tightly closed. Handle with care.

Environmental labelling

Green Building Standards

This product contributes to Green Building Standard credits by meeting the following specific requirements:

LEED®v4 (2013)

MR credit: Building product disclosure and optimization

-Material Ingredients, Option 2: Material Ingredient Optimization, International Alternative Compliance Path - REACH optimization: Fully inventoried chemical ingredients to 100 ppm and not containing substances on the REACH Authorization list – Annex XIV, the Restriction list – Annex XVII and the SVHC candidate list.
- Environmental Product Declarations. Product-specific Type III EPD (ISO 14025;21930, EN 15804).

BREEAM® International (2016)

Mat 01: Product-specific Type III EPD (ISO 14025;21930, EN 15804).

BREEAM® International (2013)

Hea 02: VOC content for Binding Primers SB (750 g/l) (EU Directive 2004/42/CE).

Additional certificates and approvals may be available on request.

Health and safety

Please observe the environmental and precautionary notices displayed on the container.

A Material Safety Data Sheet for the product has been issued.

Detailed information regarding health and safety risks and precautions for the use of this product is specified in the product's Safety Data Sheet.

First-aid measures, refer to section 4.

Handling and storage, refer to section 7.

Transport information, refer to section 14.

Regulatory information, refer to section 15.
